Eastway in partnership with Corcan is pleased to present fully refurbished Orion VI low floor transit buses for your transportation needs.

All buses have been completely stripped and rebuilt at Corcan facilities under the supervision of Eastway staff and Corcan engineers. All participants in the program with Corcan are provided the best available training in heavy equipment repairs and refurbishing. In addition the program is recognized by the Ministry of Training Colleges and Universities, with participants earning credits toward their apprenticeship accreditation through the program. All participants are also trained in the various types of welding towards their certificate from the Canadian Welding Bureau.

Vehicles are available in a base refurbished condition, all structural components are inspected and repaired or replaced. Upgrades are available and include remanufactured Detroit Diesel 50 Series engine, Allison B400R transmissions and remanufactured alternator, starter and air compressor. Additional upgrades are Recaro 9100 ALX drivers seat, matched seat insets, wheelchair restraints, Luminator Horizon Gen 4 front, side and rear destination signs, LED lighting and custom paint.

Available for sale, lease, or lease to own
